

ASSOCIATE OF SCIENCE

Secondary Education

Associate programs are typically two-year degrees designed for students who plan to transfer in the future. It is important for students to communicate with their advisor about future academic plans in order to ensure academic success. If you have previously attended college, you will need to request transcripts to be sent to Dakota College at Bottineau because some of your courses might count towards your degree.

Why study to earn your secondary education degree?

DCB's Associate of Science (AS) in Secondary Education program prepares students to transfer to a four-year college/university to pursue teaching at a high school level. This program requires students to complete 60 credits of general education classes as well as six core classes for Secondary Education.

This degree is targeted for those who are interested in junior high and high school students in a particular subject area.

Career choices

Professionals with their Secondary Education AS degree who transfer on and complete a bachelors and/or masters can have a rewarding career as a secondary school teacher.

Focused courses for your degree

The curriculum includes:

- SPED 110 – Introduction to Exceptional Children
- MATH 277 – Mathematics for Elementary Teachers I
- EDUC 101 – Introduction to Para Education
