

ASSOCIATE OF SCIENCE

Elementary Education

Associate programs are typically two-year degrees designed for students who plan to transfer in the future. It is important for students to communicate with their advisor about future academic plans in order to ensure academic success. If you have previously attended college, you will need to request transcripts to be sent to Dakota College at Bottineau because some of your courses might count towards your degree.

Why study to earn your elementary education degree?

Elementary teachers are in high demand in our region. DCB's Associate of Science (AS) in Elementary Education program prepares students to transfer to a four-year college/university. This program requires students to complete 41 credits of general education classes as well as 21 core classes for Elementary Education. This degree is targeted for those who are interested in working with elementary students in a public school setting.

Career choices

Professionals with their Elementary Education AS degree who transfer on and complete a bachelors and/or masters can have a rewarding career as an elementary/middle school teacher.

Focused courses for your degree

The curriculum includes:

- SPED 110 – Introduction to Exceptional Children
- MATH 277 – Mathematics for Elementary Teachers I
