

ASSOCIATE OF SCIENCE

Finance

Finance is fundamentally about managing money, whether for individuals, institutions, organizations, or other entities. Studying finance will lead you to learn a great deal about how money works, and about financial instruments, stocks, bonds, and markets. This information will then allow you to determine important information and advice for institutions regarding the management of their finances.

Why study finance?

Those studying finance will learn how to advise others in making strong investments, and in how to manage funds and finances. They gain skills such as being able to establish and manage budgets; being able to monitor important financial markets and economies use that information for practical effect; and advising and assisting in important investment decisions.

Career choices

- Financial planner
- Financial analyst
- Investor relations associate
- Budget analyst
- Actuary
- Accountant
- Credit analyst
- Commercial real estate agent
- Business instructor

General education requirements
