

ASSOCIATE OF ARTS

ECONOMICS

Start small...go far with Dakota College at Bottineau.

The professional world is filled with many different opportunities to utilize a degree in economics. Economics is the study of the production, distribution and consumption of goods and services. In DCB's **Associate of Arts (AA) in Economics** program, students will gain an understanding of basic micro- and macroeconomics, as well as a strong foundation in mathematics. Specifically, students will study calculus, accounting, and elementary statistics.

Why study Economics?

Graduating with a degree in economics shows future employers that you understand basic economic principles, and can apply these principles in the workforce. This understanding includes, but is not limited to, understanding supply and demand curves, elasticity of demand, consumer tendencies, and the application of critical thinking to assess different situations. Many employers are looking for employees that can apply these skills.

Career choices

Professionals with their **AA in Economics** who transfer on and complete a bachelors, masters and/or Ph.D. can have a variety of careers due to the interdisciplinary nature of the field. Your economics degree applies to many different jobs because you will learn skills that are important in a variety of industries. Some examples of economic careers include:

- Economic researcher
- Government consultant
- Data/risk analysis
- Market researcher
- Business consultant
- Financial planning
- Economic forecaster
- Human resources

General education requirements

These required classes will allow you to transfer to a four-year university.

Core courses for your degree

You will study microeconomics, macroeconomics, calculus, and elementary statistics.

“Economics has material that will be useful in everyday life. We learn more about the way our U.S. economy works, and that is something we should never forget.”

— Hayden Holtzclaw
Peyton, CO
