General Education Goals/Objectives:

This course meets General Education Goal 5: Employs the principles of wellness (Objective 1; Skill 2).

Relationship to Campus Theme:

Yoga practice through poses/postures and breath are designed to tone, strengthen, and align the body. These poses/postures are performed to make the spine supple and healthy and to promote blood flow to all the organs, glands, and tissues, keeping all the bodily systems healthy. On a mental level, yoga uses breathing techniques and meditation to quiet, clarify, and discipline the mind. Movement adds connection from one pose/posture to the next...thus creating a continuous flow. Tai chi brings a precise movement and a calm presence to the body and mind to prepare the student for their yoga practice. Students will experience a safe, low impact workout that will bring balance into their daily lives and take them beyond their normal comfort zone.

Classroom Policies:

By participating fully (mentally and physically) in each class session, the student will notice significant changes in his/her body. Please refer to the Requirements section stated above which must be adhered to in order to receive your grade. You will have to attend and participate in order to receive a grade.

Academic Integrity:

Please be true to yourself and your body. Be patient and persistent with your practices as they will give you gratitude and self-satisfaction daily.

Disabilities and Special Needs:

Please inform the instructor within the first week of classes if modifications are needed due to disabilities or special needs.
