Course Prefix/Number/Title: **HORT 121 Introduction to Aquaponics**

Number of credits: 2

Course Description: Course provides an overview of aquaponics and its history, five different plant growth subsystems, fish and plant species, fish and plant health, and environment control methods. It will be a “modular course”. Modular is defined as a course that is shorter than a full semester term and can start and end on any week during a term. Course meets the credit hour requirement.

Pre-/Co-requisites: None

Course Objectives:

- Demonstrate a basic understanding of aquaponics.
- Identify and explain the difference between the five aquaponics systems.
- Explain the key factors of water quality for sustaining a favorable soilless and aquatic environment.
- Display proficiency in basic daily operations pertaining to the fish and plant health.
- Demonstrate awareness of recent trends and techniques used in aquaponics to make operations more productive and efficient.

Instructor: Keith Knudson
Office: 105 Simrall Blvd.; Bottineau, North Dakota 58318
Office Hours: TBD
Phone: 701-228-5489
Email: keith.knudson@dakotacollege.edu

SKU Number: AFPB

Course Requirements: This is a pass/fail course.
Course Requirements: Grading will be based on the following to obtain points. There will be two checklists each worth 10 points; four quizzes* each worth 40 points; 3 forums each worth 40 points; and a final exam worth 100 points. Total possible points for the course are 400.

Pass = 280 points or more
Fail = 279 points or less
*Quizzes will be manually reviewed and graded during the following week. While you may receive an automated grade, that grade will not be final until the instructor has reviewed the quiz and made adjustments to the score. During the review, the instructor will adjust scores to allow for minor misspellings. Any essay questions will have to be manually scored as well.

Tentative Course Outline:

- Introduction – Aquaculture, Hydroponics and Aquaponics
- History of Aquaponics
- The Process
- System Components
- System Designs
- Fish Selection and Plant Selection
- System Start Up, Operation and Maintenance
- Plant Health and Care
- Lighting
- Fish Health and Feeding

General Education Goals/Objectives: Must follow general suggested program outline.

Relationship to Campus Theme: This course is part of our Aquaponics Production and Management program and it addresses the campus theme of Nature, Technology and Beyond by learning about our natural resources and how best to utilize each resource. The latest technology is discussed and demonstrated.

Classroom Policies:

1. Be respectful of other students, instructors, and guests.

Student Email Policy:
Dakota College at Bottineau is increasingly dependent upon email as an official form of communication. A student’s campus-assigned email address will be the only one recognized by the campus for official mailings. The liability for missing or not acting upon important information conveyed via campus email rests with the student.

Academic Integrity: All students are expected to excel to the best of their ability. Students must adhere to the highest standards of academic integrity. Dishonesty in the classroom or laboratory and with assignments, quizzes and exams is a serious offense and is subject to disciplinary action by the instructor and college administration. For more information, refer to the student handbook.
Disabilities and Special Needs: If you have a disability for which you are or may be requesting an accommodation, you are encouraged to contact your instructor and the Learning Center (701-228-5479) as early as possible during the beginning of the semester.
