Description of Program

The Horticulture Department offers one-year and two-year programs in horticulture. There are four horticultural options: Greenhouse Technology, Aquaponics Production, Specialty Crop Production, and Floral Design. Students will receive a horticulture degree or certificate that identifies with one of the below focus areas. To receive recognition of a focus area on the student’s transcripts they must complete at least 10 of their elective credits within that focus area.

Freshman Year

Fall

Course Code	Title	Credits
PLSC 210	Horticulture Science	4.0
