

Welcome to Intermediate Algebra!

MATH 102 Syllabus—Spring 2015

Instructor: Monica Stover

Office: Administration 160

Contact: monica.d.stover@minotstateu.edu or (701) 858-4342

Office Hours: Drop-In or By Appointment

Technical Problems: If you have a technical program with MyMathLab, please visit http://www.pearsonmylabandmastering.com/northamerica/mymathlab/students/support/.

Class Schedule: MTuWTh 1:00-1:50 in Memorial 228

Prerequisites: Appropriate placement score or a "C" or better in ASC 094: Beginning Algebra

Welcome to Intermediate Algebra! This intensive four credit course will span sixteen weeks. <u>This class does not satisfy college graduation requirements for math!</u> Throughout this course you will be asked to complete daily homework assignments (Monday—Thursday), quizzes, chapter tests, and a final exam. Topics covered will include properties of the real number systems, factoring, linear and quadratic functions, polynomial and rational expressions, inequalities, systems of equations, exponents, and radicals. This course will utilize the MyMathLab system for homework, while quizzes and test will be taken on paper in the classroom. If you do not understand something in or out of class, don't forget that *you are not in this alone*! Stop me in class when you do not understand, utilize the "help me solve this!" feature in MyMathLab when you are stuck on a question, stop by my office if you would like to go over something in more detail, create a study group with your classmates, and/or ask for a tutor. This class will be challenging, but *YOU CAN DO IT!*

As an active participant in this class, you will learn techniques to analyze and solve various types of intermediate algebra problems and utilize a graphing calculator to solve algebra problems, when necessary. <u>The following graphing calculators are approved for this course</u>: **TI-83 or TI-84**. These can be purchased on your own or in the MSU bookstore. Calculators haven't changed much in the last twenty years, so don't hesitate to purchase a used one.

As an active participant in this class, you will be attending class for four hours each week. These classes will utilize both direct instruction and collaborative learning. This course utilizes an online learning system called MyMathLab. Through MyMathLab, students will have access to worked out explanations, textbook lessons, and video demonstrations. Students may also utilize the e-mail tool to ask classmates and the instructor questions about assignments.

Note: While you do have access to helpful learning tools in MyMathLab, these tools are not a replacement for classroom instruction and participation. <u>*Expect to attend every class!*</u>

Beginning and Intermediate Algebra by Tobey, Slater, Blair, and Crawford; 4th edition; Pearson. **NOTE:** You have the option of purchasing the online-only text or the textbook with the online component. I suggest you use the free two-week trial of the online textbook before making your final decision. You can purchase your textbook or online access code at the MSU bookstore.

NEAU MINOT CAMPUS

Learning algebra is an *investment of time*. Algebra is learned best by practicing, reflecting, and practicing some more. While understanding the steps in the topic explanations and video presentations is a good first step, to truly master the material you should be able to look at a problem, know how to proceed and be able to carry out the steps **WITHOUT ASSISTANCE**. The multiple attempts allowed during independent practice (including homework and practice tests) in MyMathLab provides opportunities for you to get to that point. Passing grades on quizzes and chapter tests demonstrate that you have indeed mastered the skills taught.

Evaluation

| Homework—15% | Homework can be found under the may work ahead, but each homework the due date listed otherwise there or higher are required to proceed to There is no limit to the number of assignment. | ork assignment mu will be a 30% pen o the subsequent h | ist be completed by alty. Grades of 80% omework assignment. |
|--------------|--|--|---|
| Quizzes—25% | Mid-chapter quizzes will be taken on paper in the classroom, unless otherwise stated. <u>Missed</u> <u>quizzes must be</u> <u>made up within</u> <u>three business</u> <u>days.</u> | Tests 60% | Homework 15% Quizzes 25% |
| Tests—60% | There will be five tests throughout the semester. You test score. <u>There will be no make</u> | • | replace your lowest |

Based on North Dakota state policy, students must earn a grade of C or higher to be promoted to the next level of college mathematics. Letter grades are assigned using the following scale.

A 89.50%-100% B 79.50%-89.49% C 69.50%-79.49%

- **D** 59.50%-69.49%
- **F** 59.49% or lower

Goal 3: Demonstrates the ability to convert, calculate, and analyze a variety of mathematical problems Objective 1: Utilizes mathematical equations to solve problems

Skill 1: Solves equations and problems using the appropriate method

Objective 2: Applies practical application of mathematics to everyday life

Skill 2: Defines and demonstrates the use of decimals, percentages, and fractions Skill 3: Solves word problems

The student will begin to see applications of algebra in nature, business, health, construction, etc. As they use the graphing calculator, they can solve real life problems with large numbers. These problems will require critical thinking and interaction with other students.

Attendance

The sequential nature of mathematics deems it necessary for students to attend class and *participate* on a regular basis, therefore one of the course requirements is *regular attendance and participation*. If are unable to attend class for whatever reason, please notify the instructor immediately.

Assignments

Students may work ahead; however, each assignment must be completed on or before the due date to receive full credit.

Electronic Devices

Turn off or <u>mute</u> (not vibrate) cell phones, pagers, and other electronic devices. Students who text, use snapchat, or do anything else on their cellphone during class will be made fun of. If your cellphone use is disturbing others, you will be asked to leave. <u>There will be absolutely no</u> <u>headphones in my classroom</u>.

Dakota College at Bottineau is increasingly dependent upon email as an official form of communication. A student's campus-assigned email address will be the only one recognized by the campus for official mailings. The liability for missing or not acting upon important information conveyed via campus email rests with the student. Therefore, you MUST use your school e-mail address to create your MyMathLab account!

AU MINOT CAMPUS

The academic community is operated on the basis of honesty, integrity and fair play. It is the expectation that all students, as members of the college community, adhere to the highest levels of academic integrity. This means that

- Students are responsible for submitting their own work. Student work must not be plagiarized.
- Students must not work together on graded assignments without authorization from the instructor or get help from people, technological resources, textbooks, notes, etc. on examinations.

Violations of academic principles such as cheating, plagiarism or other academic improprieties will be handled using the guidelines outlined in the Student Handbook.

Disabilities and Special Needs

If you have a disability for which you need accommodation, please *see me immediately*. If you have already met with Student Developmental personnel, please provide me with the information regarding your needs so that I can make the appropriate accommodations.

Key Considerations for Academic Success

- ✓ Be an active participant in class every day. Use the e-mail tool to ask your classmates questions and don't forget to utilize your instructor!
- ✓ Balance school with the rest of your life. Plan enough study time to do well in this class. You can expect to spend 2-3 hours on each homework assignment.
- ✓ Use good study habits and get academic assistance at the first warning sign! If you are struggling with a topic or homework assignment don't hesitate to *ask someone!*
- ✓ Understand the impact of dropping classes both academically and financially.
- \checkmark Don't put off for tomorrow what you can do today.

Smarthinking is an online tutoring service that includes tutorials and live chat twenty-four hours a day, seven days a week! To access Smarthinking, login to *Moodle* by going to <u>www.dakotacollege.edu</u> \rightarrow online students \rightarrow go to class. You will login using your CampusConnection username and password. Once logged in, click on the *DCB Learning Center* link. Then locate *Resources and Technology*, and click on the *Smarthinking* link. If you have questions about Smarthinking, please contact the distance education office at 1-888-918-5623.

The Khan Academy has an extensive library of content, including interactive challenges, assessments, and videos that students can access from any computer with access to the internet. If you're stuck on a topic, visit <u>www.khanacademy.org</u> and find a video and an exercise to help you out!
