

ASSOCIATE OF ARTS/ASSOCIATE OF SCIENCE

Liberal Arts

The Associate of Arts (AA) and Associate of Science (AS) degrees at DCB offer you flexibility in planning your education. If you are planning to continue your education toward a bachelor's degree or other academic programs beyond a two-year degree, you can explore many options from among all the classes and programs offered at DCB.

Why study to earn your liberal arts degree?

The general education requirements build the foundation for further education. You have the flexibility to build that foundation in a variety of areas. You may choose from many options to find the program you want to continue studying and to transfer to further your education.

Transfer choices

The AA/AS is a transfer degree for students planning to continue their education in a four-year program. Students who take this degree may find work in fields that require analytical, organizational, and software/internet skills.

General education requirements

This degree requires 61 credits to graduate. That total comes from communication, humanities, social sciences, math, science, computer science, and HPER (health, physical education, and recreation) courses chosen by you in consultation with your advisor. When the required courses have been completed, you may choose from many offerings available to meet the remaining credit hour requirements for graduation.

“Earning a degree takes time, patience and hard work. For me, online classes are the way to go. I work full time, and have three kids. If it were not for online classes, I would never have a chance at getting my degree. I am so thankful. I can do my school work on my time and in the privacy of my home.”

— Alysia Campani, Grand Forks
