

ASSOCIATE OF APPLIED SCIENCE

Photography

Professionals in commercial photography can work in a variety of atmospheres. They might open their own business doing portraits, senior photography, weddings, landscape, and advertising photography. They may work for a photography studio creating images, managing the studio, assisting the photographers, and editing photos. Some work as creative directors where they oversee hiring and communicating projects to photographers. Some will work in video and film creation. Experience, strong visual communication skills, creative thinking, persistency, problem solving, and a solid business sense are the main components to success in the photographic industry.

Why study commercial photography?

DCB's Associate of Applied Science (AAS) in Photography prepares individuals to creatively problem solve with visual communication skills to ultimately fulfill a client's need. This includes client assessment, image creation techniques including 2D design, camera and lighting skills, postproduction skills, business practices, and creative solutions. The use of still and moving imagery is increasingly in high demand with the rise of social media. Additionally, creating images can be a fun and rewarding career.

Career choices

Professionals with their Photography AAS can have a variety of careers due to breadth of the field. Your degree applies to many different jobs because you will learn skills that are important to a variety of industries. Some examples of careers include:

- Portrait photographer
- Fashion photographer
- Digital technician
- Lighting technician
- Photography assistant
- Campus photographer
- Creative director
- Advertising photographer
- Studio manager

Focused courses for your degree

This program focuses on photography courses specifically and includes fewer of the general education courses required in an AA or AS degree. You will take 11 photography classes including basic photography, lighting, post-production, intermediate, portraiture, advertising, documentary, outdoor, conceptual, practicum (including events and sports), and portfolio. Students will also take business communications and entrepreneurship courses.

“ The photo program at DCB helped me build on my passion as a photographer. The classes taught me how to use my camera in more creative ways along with providing me a solid understanding of lighting. The program provided computers, cameras, lenses, lights and other gear that helped me build a portfolio. Now, I am the owner of my own photography studio where I get to create portraits and realize my dream of being a professional photographer. ”
