

DAKOTA COLLEGE AT
BOTTINEAU

ASSOCIATE OF APPLIED SCIENCE

Agriculture Management and Technology

The **Agriculture Management and Technology** program is designed for individuals who are looking to advance their career opportunities and obtain practical, hands-on work experience through agricultural internships. Students will have the option to complete a one-year certificate program or a two-year associate degree program.

Why study agriculture?

This program prepares students for rewarding opportunities in the growing field of agriculture by providing them with quality education and training and practical work experience.

Career choices

There are many employment opportunities with agronomy centers, farming or ranching operations, grain elevators, equipment and parts dealerships, state/federal agencies and numerous other employers in the agriculture industry.

Focus areas

Agribusiness: Prepares students for careers in agribusiness and a variety of fields in agriculture and agricultural supports areas including banking, finance, crop insurance, and consulting.

Crop Production: Prepares students for careers in crop production through instructional and hands-on learning in the production, scouting, disease management, and harvesting of crops.

Livestock Production: Prepares students for a career in a variety of fields associated with livestock production. Students will develop the knowledge and skills necessary to work in an animal science specific field, support, field, or a related field associated with livestock business and finance.

Specialty Crop Production: Prepares students for a career in specialty crops through instruction and hands-on learning in the production, harvesting, marketing, and use of specialty crops. Specialty crops include edible fruit, vegetables, and herbs.

 **Lake Region**
State College

 **WILLISTON**
STATE COLLEGE

The AAS in Agriculture Management and Technology is offered in co-operation with Lake Region State College and Williston State College.
